Vovchok Anatoliy

I have been studying Web development for 1.5+ years now. Has internship and startup experience, as well as freelance projects and part-time jobs. I am looking for a job where I can develop as a professional and work with modern JS frameworks and libraries. Always open to learning new things and, if necessary, ready to learn to use unfamiliar tools or programming languages. In my spare time, I am developing my own application in React + Express + MongoDb. In it, I try to use the latest technologies and keep the code clean with ESLint (airbnb).
